## TEACHING EXPERIENCE

### Undergraduate Level

PSYC3032: Topics in Social Psychology (University of Queensland): topics included basic motivations (esteem, belonging, control, understanding, and autonomy), the self, goal pursuit and self-regulation, perceiving others, affect, attitude formation and change, stereotypes and prejudice, and levels of analysis. *Teacher effectiveness rating: 4.63/5*

PSYC2063: Psychological Approaches to Complex Problems (University of Queensland): this class taught students how to formulate and test hypotheses involving complex, real world variables using a variety of approaches (archival analysis, correlational studies, experiments). Specific topics included alcohol policies, the internet, crime, sexual orientation, parental influence, emotion, eating behaviour, intelligence, implicit measures, and gender differences in math and science. *Teacher effectiveness rating: 4.40/5*

PSYC2040: Social & Organisational Psychology (University of Queensland): my lectures focused on the following topics: attribution, emotion, attitudes, aggression, group processes, and norms/deviance. *Teacher effectiveness rating: 4.27/5*

PSYC2010: Psychological Research Methodology II (University of Queensland): Topics covered include design and measurement issues, methods for analysing psychological data (e.g., t-tests, ANOVA, nonparametric tests, correlation, and regression), procedures involved in the reporting of psychological research, and issues concerned with the interpretation of such research. *Teacher effectiveness rating: 4.47/5*

Introduction to Social Psychology (University of Houston): topics included methods, social cognition (including an article on mimicry), social perception, the self, dissonance, attitudes, conformity (including an article on obedience), groups, attraction, helping, aggression (including an article on alcohol myopia), stereotypes and prejudice. *Teacher effectiveness rating: 4.71/5*

Experimental Social Psychology (Ohio State University): students read 7 articles on a specific topic area (attitudes and persuasion) and conducted their own project as they learned about social science research, variability, basic issues in experimental research, experimental design, quasi-experimental designs, ethics, measures, descriptive research, correlational strategies, analysing experimental data, drawing conclusions, making posters, and careers in psychology. *Teacher effectiveness rating: 4.76/5*

### Postgraduate Level

Attitudes and Persuasion (University of Houston): topics included implicit and explicit attitude measurement, affective and cognitive bases, mere exposure, evaluative conditioning, negativity bias, functions of attitudes, dual process theories of attitude change, matching effects, source credibility, self-persuasion, predicting behaviour, cognitive dissonance theory, and self-perception theory. *Teacher effectiveness rating: 4.74/5*

Stereotypes and Prejudice (University of Houston): topics included early theorizing (Allport, Adorno), implicit measures, categorization, dual process theories, parallel

constraint satisfaction theory, stereotypes as hypotheses, social identity, social dominance, symbolic racism, stereotype development, stereotype change, stereotype content (gender, age, race, beauty), stigma, linguistic and explanatory biases. *Teacher effectiveness rating: 4.60/5*

Foundations of Social Psychology (University of Houston): weekly readings included general overviews of the major topic areas of social psychology and empirical articles on specific issues within those areas. Topics included obedience, the self, attribution, social cognition, affect, stereotypes and prejudice, attitude change, social influences/group behaviour, attraction and relationships, aggression, and prosocial behaviour. *Teacher effectiveness rating: 4.29/5*

## **THESIS AND DISSERTATION SUPERVISION**

### **PhD Supervision at the University of Queensland** (advisory load is given in parentheses)

Clinton Knight: *Refining the boundary conditions of system justification theory*. (80%)

David Clark: *An evolutionary approach to loneliness*. (50%)

Megan Smith: *Self-deception: Causes and consequences*. (20%)
